

SSAT school improvement consultancy

Get an objective evaluation of your school's specific requirements, identify focus areas and access the right tools, advice, resources and programmes for improvement

We offer full in-school support and consultancy in best practice, identifying the areas which require focus and prioritisation. Our specialist areas of expertise include teaching and learning, leadership and management, safeguarding and behaviour.

How it works

All consultants are highly experienced as senior leaders or advisors with expertise in primary, secondary, post-16 and special education. You will gain invaluable support and guidance, confirming best practice and facilitating strategic school improvement. We can help with:

Subject or theme reviews

SSAT experts review the leadership and performance of a subject area or an area of your school's work in order to improve the quality of teaching and learning and student achievement.

Support for self-evaluation

SSAT experts work alongside your school's senior and middle leaders to evaluate the accuracy of your current self-evaluation. This can include leadership and management, teaching and assessment, behaviour and safety and outcomes. We will

work with you according to your specific requirements, testing out your judgements by observing lessons and talking to key staff and students.

Multi-academy trust support programme

SSAT experts review performance over a range of indicators to identify common strengths and areas for improvement. This is followed up by a range of appropriate development activity at whole-school and area level.
