

SSAT Teaching and Learning Improvement Programme

The support you need to rapidly improve practice in your classrooms

If you have an immediate need to improve the quality of teaching and learning across your secondary school, the SSAT Teaching and Learning Improvement Programme can help you and your staff build the foundations, develop the structure and provide the inspiration required to achieve your goal.

How the programme works

Timed flexibly to suit your school's needs but ideally phased over the course of approximately one term, SSAT will work with you through this intensive programme to identify strengths, pinpoint areas for improvement, and determine the teaching and learning priorities you will need to focus on to secure the outcomes you want for your students. Our practical approach means we will create opportunities to practice and adapt appropriate strategies and resources, rapidly putting you on the pathway to consistent good practice across your school. TLIP will help develop your teachers into more energised, motivated, confident practitioners who can be more effective in achieving positive outcomes.

The programme will

- ▶ Provide guidance and support to build the capacity of key staff to sustain improvement
- ▶ Give practical, tried and tested strategies to improve classroom practice which can show positive impact quickly
- ▶ Introduce a pathway which moves practice in classrooms across your school to the next level
- ▶ Encourage collaboration which inspires and re-energises your teachers to make a real difference to outcomes for your students
